Going Green; towards sustainability in conservation

Friday 24th April 2009, The British Museum, Clore Education Centre: *Conservators and their colleagues are responding to the need to reduce the environmental impact of their professional activities. Such efforts may also anticipate regulatory requirements, given national and international commitments to reduce carbon emissions. The Department of Conservation and Scientific Research at the British Museum will host a one-day meeting in April 2009; Going Green; towards sustainability in conservation, which will allow professionals to demonstrate and share best practice. This meeting aims to show examples of successful practical adaptation to increase sustainability within the conservation studio as well as the broader aspects of collections care.*

For further details, registration (£35-£15) and call for papers please go to:
