

# Subject Index to Volume 36, 2003

- Alkynes, 3  
Alloys,  
  gold-tin, 29  
American Catalysis Society,  
  Cancun Conference, 105  
Analysis,  
  non-destructive methods, 125  
Anti-tumor, 117  
Artifacts,  
  gold, 141  
Atomic absorption, 26  
Aurophilic effects, 151  
  
Biocompatibility, 98  
Biomedical, 21  
Bruggeman,  
  theory, 12  
  
Casting alloy, 148  
Catalysis, 66, 109  
  CO oxidation, 27  
  electrocatalysis, 18  
  fuel cell, 27  
  gold, 152  
  hydrogen peroxide formation, 26  
  platinum & gold, 27  
  reduction of NO<sub>x</sub>, 26  
Catalyst,  
  core shell, 75  
  homogeneous, 3  
Catalysts,  
  gold reference, 24  
Catalytic activation, 78  
Chemiluminescence, 109  
Chemistry,  
  gold intermetallic, 39  
  magneto-optical effects, 27  
Chrysotherapy, 118  
CO oxidation, 67,110  
Colloidal gold, 72  
  
Dentistry, 93  
  
Electrocatalytic oxidation,  
  methanol, 80  
Electrochemistry, 32 68, 111  
Electroforming, 97, 148  
Electronics, 29, 111  
Europacat (VI), 152  
  
Fluorescence,  
  spectra, 129  
Fulminating gold, 155  
  
Gold,  
  alloys, 40, 43, 46, 125, 70, 139  
  analysis, 125  
  anti-tumor, 117  
  artifacts, 141  
  biosensors, 146  
  Bulgaria, 138  
  cancer treatment, 103  
  catalysis, 144, 145, 146, 152, 154  
  catalyst, 3, 21  
  catalysts supported, 66  
  ceramic screen printing, 36  
  clusters, 32, 88  
  coating, 68  
  cold worked, 31  
  dental, 30  
  drugs, 117  
  E.D.A.X., 125  
  electrochemistry, 28  
  electrodes, 69, 111  
  electronics, 29, 145  
  electroplating, 29  
  extraction, 34, 35, IBC 36(2)  
  extraction method, 142  
  fines, IBC 36(3)  
  food preservative, 35  
  fuel cells, 17  
  fulminating, 155  
  glasses, 10  
  globules, 141  
  Greek history, 138  
  hydrosol, 112  
  industrial applications, 144  
  inks, 149  
  laminated flooring, 36  
  leaching, IBC 36(2)  
  luminescent properties, 147  
  medical, 30, 70  
  medicine, 117  
  microwave resistant, 36  
  monolayers, 27  
  Mossbauer, 67  
  nanoparticles, 13, 26, 28, 75  
  nanorods, 71, 109  
  nanowires, 34  
  optical properties, 10, 51  
  optical waveguides, 31  
  phase diagrams, 40  
  placer, 138  
  porcelain, 36  
  powders, 30  
  recovery, 34, 35  
  reference catalyst, 24  
  refining, 34  
  ringlets, 141  
  rivets, 141  
  Roman province, 138  
  sensors, 147  
  soldering, 69  
  surface chemistry, 154  
  tailings, 142  
  thin films, 30, 65  
  thin layers, 70  
  ultrafine milling, 34  
  wire, 65  
  wires, 29  
Gold 2003,  
  Vancouver, 144  
Gold alloys, 95  
Gold compounds,  
  anti-tumor agents, 121  
Gold compounds,  
  therapeutic potential, 118  
Gold connectors, 104  
Gold fibre, 149  
Gold powders, 30  
Gold(0) complex, 86  
Gold(I) compounds, 90, 117  
Gold(III) complexes, 83, 117  
Gold(III) complexes, 85, 86  
Gold-copper ores, IBC 36(2)  
Gold-lead ores, 35  
Gold-silica, 33  
Gold-tin,  
  solder pastes, 149  
  
High oxidation states, 83  
Hydrogen generation, 17  
Hydrometallurgy, 112  
  
Ink jet printing, IBC 36(3)  
In-situ raman, 25  
Intermetallic, 39  
Ion exchange resins, 36, 68  
  
Luminescent properties, 147  
  
Maxwell-Garnett,  
  theory, 11  
Medical, 111  
  arthritis, 20  
Micro analysis, 134  
Monolayers, 69, 149  
Morphology,  
  nanoparticles, 32  
  
Nanoparticles,  
  gold, gold/silver, 26  
  
Nanocomposites, 72  
Nanoparticle assemblies, 107  
Nanoparticles, 31, 32, 33, 67  
  composites, 14  
  shape, 52  
  size, 51  
Nanoprobes, 21  
Nanorattles, 72  
Nanoscale, 144  
Nanoshells,  
  optical properties, 146  
Nanotech Japan, 59  
Nanotechnology, 31, 71, 149  
Nanowires, 34  
Nucleophiles,  
  nitrogen, 4  
  oxygen, 5  
  
Optical properties,  
  theoretical, 11, 51  
  
Pharmaceutical applications,  
  gold, 148  
Photonic applications, 149  
Placer gold, 138  
  
Raman spectroscopy, 28  
Reduction,  
  oxygen, 80  
Refining, IBC 36(3), 34  
Rheumatoid arthritis, 117  
  
Sensors, 111  
Solar panels, 103  
Solid alloy, 135  
  
Thin films, 30  
  
Vancouver,  
  report, 144  
Vancouver 2003, 22, 63, 144  
  
X-ray fluorescence, 126
